

**Amendments to the Drawings:**

The attached sheet of drawings includes changes to Fig. 3. This sheet, which includes Fig. 3, replaces the original sheet including Fig. 3. In Figure 3 the description of step 124 has been corrected to recite: "Directing, in response to the determination, at least one beam of radiation having a first cross-section towards an saturable absorber such as to allow a portion of said beam to propagate towards a radiation sensitive layer; wherein the portion has a second cross-section that is smaller than the first cross-section", as described in the specification at paragraph [0020]. No new matter is added by this amendment.
